

Coasters Kemp Club

Lowdown

Feb. 2004

Did I ever tell any of you that I love putting together this newsletter???? I was warned by others that it can be a thankless job, it can be but, its rewards far outweigh it's shortcomings. First: I have met so many club members, new and old, from all over the place, second: now when I go to an event/car show/ flea market, I get to play "roving" reporter.....It is like CNN only there are Kustom cars rolling across the bottom of the screen instead of boring news.....I just got back from my yearly holiday in Florida, I tell you all, Kustoms are alive and well in the sunshine state. It reminds me of all my projects sitting back at home not getting done, and it gives me that Kustom car injection to get me past the last of the winter "no car" blues. Ancaster's two flea markets are coming up, the first of which is just weeks away. (I'm looking forward to them).

Once again Brandon Robert's hard work behind the scenes, is paying off for everyone, ideas are being bounced around, regarding the Low Down in web site form.....any input ??? just send it in to Brandon or I, and you will see it here in print....Also the Membership by committee forum....it has been dechromed but none of the holes have been filled in on the idea. Want on the committee..??? Take two steps forward and call Brandon. Most important of all it is YOUR car club... where do you want to take it?????

Roy Boy (the rolled and pleated interior), Brandon Roberts (the hopped up engine) Jeremy Grady (the primer spots—somebody has to be the primer spots) Jason McBride (the cut coil springs), Adam Pettengill (the flame throwers), Brent "Nibs"(all that cool pinstriping), Pete Slack (the lake pipes).....All together make up this newsletter/cool Kustom this month....isn't it amazing that each issue just like every Kustom car, turns out so different. I see each of your hard work just about every issue.....Haven't sent any thing in yet??? What are you waiting for???? Be there or be square...
