

Coasters Kemp Club

Lowdown

October 2003

The Coaster's must be doing something right....The club is 10 plus years in the running. Our "Lead North" car show /festival/flea market/party....was one of the HOTTEST of the summer, and with a good cause like the wheel chair challenge to tackle, we always come out on top. Why would anyone not want to cruise with the coolest???

It is early October as I write this....frost is showing up on daily driver every morning now, the auto trader is full of "deals !!?" because people don't want to store that treasure for the winter. Is it just me or did this summer fly by?

First off: Lead North.....went off with a bang!!! An excellent time was had by all. Dave and Peggy, you two deserve the biggest thank yous...for opening your home to us "Rowdies and Rowdettes" as Roy likes to call us. A lot of stories, memories and fun all packed into one weekend....Roy said it best "the worst part of the entire weekend is that it has to end." Thanks also have to go out to Darcy for his fine organization skills, and every club member that put a little and not so little time into running the event. From the front door greeters ,to all the games (that's you Jeremy Grady), to the parking attendants, to the registration table, this show was run like a well oiled machine, with a little speed equipment thrown on the top for good measure .I have included as much fun packed, exhaust smelly, and oil stained moments into this issue as possible.....including photos, comments from club members, and non-club members. This is a call out to all of you to write down a good story of the weekend and send along some of your photos (don't fret you will get them back) Lead North coverage is not over yet ...we got a winter full of issues to fill up....

Roy Boy has suggested an excellent idea. With next years renewal you have to send in a photo of your car (or cars) this is not a critique of any one's car...this is to put together a historical collage of our club- be it finished or unfinished. If it is in 6 pieces ...send 6 pictures. No car right now...send in an old picture of what you used to have.....

Thanks go out to everybody that sent in stuff for this issue with out your input I would be mailing out a lot of plain white paper.....
